Full-stack web developer experienced in Ruby on Rails, JavaScript, React and Redux based programming and a background in Public Relations and Publicity. I was introduced to programming on the recommendation of a friend as another way for me to express my creativity and artistic nature. Since then, I have found a calling for developing responsive, dynamic, and user-friendly web applications.

## TECHNICAL SKILLS

Ruby, Rails, React, SQL, SQLite ActiveRecord, JavaScript, HTML, CSS, CSS Media Queries, Redux, MVC, JSON, Postgresql, Git, Heroku, Sinatra

## TECHNICAL PROJECTS

**NutriTrack** - [GitHub Frontend](GitHub Frontend) - [GitHub Backend](GitHub Backend) | [Live App](Live App) | [Demo](Demo)
*An application where users can track the nutritional values of their food intakes.*
- Implemented authorization, authentication, and persistence using Bcrypt, JWT, localStorage and Rails Credentials.
- Employed JavaScript new Date function, so a user can view and add food to their calendar.
- Utilized react-router to create client-side end-points for users to navigate from.
- Created a dynamic user interface using React/Redux and Responsive CSS to adapt to various screen sizes and devices.

**DoggoDoption** - [GitHub Frontend](GitHub Frontend)  - [GitHub Backend](GitHub Backend)
*Dog Adoption web page where people can adopt dogs.*
- Utilized Bcrypt, JWT and localStorage to authenticate and authorize the user.
- Wrote JavaScript functions to allow users to find dogs by their names.
- Made external call to an API using RestClient to save images of dogs to the Dog model on the backend.

**MeRecommends** - [GitHub](GitHub)
*A web-page for users to view or create recommendations of events, restaurants, etc. based on locations within NYC.*
- Developed a Rails API with endpoints for Users, Recommendations, and Locations.
- Incorporated localStorage to persist a user on refresh.
